Information & Cyber Security for Your Small Business

The NIST Computer Security Division has developed a workshop to **help the small/medium business owner** increase information system security.

Can you answer the following for your organization?

- What happens to your business if sensitive business information falls into someone else's possession?
- What would be the cost to be without some or all of your sensitive business information? To recreate it, if possible?
- What would be the implications to your business if you could no longer trust the accuracy or completeness of sensitive business information?

Sponsored by:

Attendees will

- Learn how to define information security for your organization.
- Hear examples of types of threats & understand how to determine the extent to which to proactively address threats.
- Learn Best Practices & procedures to operate securely.
- Hear simple explanations of current technologies used in reducing vulnerabilities and learn of resources freely available to your organization.

To Register:
Call 405-609-8000
