Your Client information.....What if it was stolen? Personnel records of your employees are breached... You could be sued. Your bank records are accessed by a cyber criminal...can you afford that?

YOU WILL LEARN: How to define information Security.

Common best practices to protect your data.

YOU WILL HEAR: Examples of common threats.

A basic explanation of current technologies.

About FREE resources available to you to protect your business.

PRESENTED BY RICHARD KISSEL of the NIST

Richard writes information security guidelines for Federal agencies and has worked in the information security profession for over 20 years. He is a nationally recognised expert in computer security and is a senior information security for the National Institute of Standards and Technology. Prior to joining NIST on 2001 Richard worked as an Information Security Analyst in the Computer security office of the SBA and holds a B.S. and M.A. in Mathematics from Austin Peay State University. Richards Certifications include : Certified Information Systems Security Professional (CISSP) Certified Information Systems Manager (CISM) and the National Security Agency certification in Infosec Assessment Methodology (IAM).

For the past 6 years he has planned and conducted information security workshops for small business owners /operators across the country.
