

Computer/Internet Security Workshop

For Small to Mid-Size Businesses

Jayson E. Street, Hacker

*(Information Security Expert
with the Banking Industry)*

Don't Get Hacked!

Prepare Your Business To Defend Against Cyber Threats

Small and mid-size business that network with social media are rapidly becoming the main target of hackers and cyber thieves. Businesses that network into social media (Facebook, LinkedIn, Twitter, and others) or simply have a web presence or swipe customer credit cards are extremely vulnerable to identity theft, data loss and other cyber disasters. With limited budgets and few or no technical experts, these businesses generally have weak security. Cyber criminals have taken notice.

Small business owners, employees, or IT professionals who support small and mid-size businesses, should not miss this free opportunity to learn from national experts. This interactive workshop provides practical tools and techniques to help you assess, enhance, and maintain the security of your systems and information.

Breakfast Refreshments provided by  **MIDFIRST BANK**

Wednesday, April 25, 2012
