

Cryptographic Key Management Workshop

March 4-5, 2014

Session 8: Comments and Feedback

Elaine Barker, Dennis Branstad and
Miles Smid

Comments Received to Date

- Comment period officially closes today (March 5, 2014), but will accept further comments for a little while longer.
- (Insert comments)

Outstanding Unresolved Issues

- The Profile currently follows the Framework outline/structure. Is there a better organization?
- Are example security policies useful/needed?
- Should security policies be specified by service-users or by service-providers?

Test Cases

- Should various FCKMS operational scenarios, designs, and test cases be created? If so, who (e.g., users, service providers, designers) should do it?
- What spectrum of FCKMS various test cases (e.g., single user, single service-using organization, multiple service-using organizations with different security policies) would be useful to designers?

What's next?

- First of all, send comments to:
FederalCKMSProfile@nist.gov.
- Then, we will:
 - Post and review the received comments.
 - Prepare another draft.
 - Request public comments again.
 - Post and address the comments.
 - Prepare final draft:
 - ✓ Coordinate internally, and
 - ✓ Obtain editorial review and approval.
 - Post/publish the final version.
- Completion date (Optimistic?): March 2015?

Wrap Up

Spring is almost here.
Yeah!!!

Thanks for Coming!
