Security**

**Cybersecurity and Communications**

# The ISSLOB

Who We are and What We Do

The Information Systems Security Line of Business (ISSLOB) was established by OMB to directly facilitate agency compliance with information security requirements, standards, and guidelines, and to improve the level of information security across government. The ISSLOB closes gaps with cost savings / avoidance options that eliminate duplication, and increasing expertise through specialization.

[Implementing the ISSLOB Chap 1 Para 1.4]

# The Purpose of the Shared Service Centers

## How SSCs Meet OMB Mandates

Shared Service Centers leverage economies of scale and expertise to provide high quality solutions at little to no cost to Departments and Agencies that could not otherwise afford or create them on their own.
