Subject: Phishing Emails...Do Not Click or Submit

FOR: All DOC Employees

*** This message is a reminder to employees; please **DO NOT** provide login and password credentials to any one requesting that type of information. ***

There has been a recent increase in phishing emails throughout U.S. government agencies. Phishing emails are sham messages that will often aim to entice you into an action that compromises sensitive information or infects your machine with malicious software, by opening an attachment, clicking on a link, or asking you to submit sensitive information.

Over the last month there have been documented reports of government employees being targeted by scams that have led to them providing usernames and passwords, email accounts being compromised, and fraudulent purchases being made in their names.

Vigilance is the best defense. If you receive an email from an unknown sender that invites you to click on a link, open an attachment, or provide sensitive information, or even a message from a known sender unexpectedly requesting sensitive information, **DO NOT** click on the link, open the attachment, or reply to the email. Notify your bureau Computer Incident Response Team (CIRT) or the DOC CIRT at 202-482-4000 for further assistance.
