

FISSEA Contest Entry Form

Name of Submitter: **Jane Moser**

Organization: **Service Canada / Human Resources and Skills Development Canada**

Type of Entry: Poster

Title of Entry: Data Confidentiality

Description of Entry:

In support of our departmental IT Security Awareness Program, we develop and produce 3 or 4 motivational posters each year. These posters are a hit with employees and form an integral part of our ongoing awareness program which provides learning using a variety of media.

This poster addresses the issue of data confidentiality.

With the majority of our employees delivering front line service to Canadian citizens, it is important that computer monitors be turned away from “prying eyes” to protect our client’s personal information and data.

I expect that this eye-catching (no pun intended!) poster will go a long way to reinforcing that good practice!

Prying eyes

**can put Protected
information at risk...**

*...position your monitor
accordingly.*
