

This DRAFT document (Draft NISTIR 7628, Revision 1, Guidelines for Smart Grid Cybersecurity: [3 Volumes]) has been approved as final and is superseded by the following publication:

Publication Number: **NISTIR 7628, Revision 1 (3 Volumes)**

Title: **Guidelines for Smart Grid Cybersecurity:**
 ⇒ ***Volume 1: Smart Grid Cybersecurity Strategy, Architecture, and High-Level Requirements***
 Volume 2: Privacy and the Smart Grid
 Volume 3: Supportive Analyses and References

Publication Date: **September 2014**

- Final Publication:
 NIST Publications Portal

The following announcement was posted about this documents release:

[October 2, 2014]

NIST Interagency Report 7628 Revision 1

NIST announces the publication of NISTIR 7628 Revision 1, Guidelines for Smart Grid Cybersecurity. The three volumes of NISTIR 7628 Rev. 1 present a comprehensive framework that organizations can use to develop effective cybersecurity strategies tailored to their particular combinations of smart grid-related characteristics, risks, and vulnerabilities. Organizations in the diverse community of smart grid stakeholders can use the methods and supporting information presented in this report as guidance for assessing cybersecurity risk and identifying and applying appropriate cybersecurity requirements. Since the original release in 2010, smart grid technologies and implementations have moved from a notional vision to deployments and stakeholders have had the opportunity to provide feedback on the report and their experience deploying systems.
