

FIPS 201-2 Workshop

NIST PIV Team

**National Institute of Standards and Technology
US Department of Commerce**

**Gaithersburg, MD
April 18 – 19, 2011**

WRAP UP

Have we missed a **Big Idea**?

1. Should USG support alternate form factors (e.g., mobile phones, USB tokens, contactless-only cards)?
2. Should USG standardize application management?
3. Should USG standardize key management processes?
4. Should USG adopt/recommend Global Platform for credential lifecycle management?
5. Should USG migrate from FASC-N to UUID?
