**Type of Entry:** \_\_\_\_\_

**Awareness Website**

**Information Systems Security Program Management  
Security Awareness, Training And Education  
Website Portal**

**Title of Entry:** \_\_\_\_\_

### **Description of Entry:**

The Information Systems Security Program Management (ISSPM) website was developed in support of a U.S. Government (USG) Insider Threat Defense Center Information Assurance (IA), IT Security and Insider Threat Security Awareness, Training and Education Program. This website is updated frequently. It includes a wealth of Security Awareness, Training and Education materials, with links to web based training. It is hosted on the Internet on a password protected website. The ISSPM website is also currently being used by other government agencies. This development of the ISSPM website was not a task that was given to me from the USG. I saw the need for a website of this magnitude, and took the initiative to develop it on my own time.
