Dear Andersen, Martin,

UK Patent No. GB2532242
Martin Tomlinson, Cen Jung Tjhai

and

PQ Solutions Limited
Public Key Cryptosystem using Error Correcting Codes

We confirm receipt of your instructions of 26 April 2018 to abandon the above-referenced GB patent and US patent application.

We will forward official confirmation of abandonment from the respective patent office to you once received.

Yours faithfully

Alvin Lam
Maucher Jenkins

Martin Albrecht  Carlos Cid  Kenneth G. Paterson  Cen Jung Tjahai  Martin Tomlinson
I, Martin Albrecht of Royal Holloway, University of London do hereby declare that the cryptosystem, reference implementation, or optimized implementations that I have submitted, known as NTS-KEM is my own original work, or if submitted jointly with others, is the original work of the joint submitters. I further declare that

- to the best of my knowledge, the practice of the cryptosystem, reference implementation, or optimized implementations that I have submitted, known as NTS-KEM may be covered by the following U.S. and/or foreign patents: GB2532242 Public Key Cryptosystem using Error Correcting Codes

I do hereby declare that, to the best of my knowledge, the following pending U.S. and/or foreign patent applications may cover the practice of my submitted cryptosystem, reference implementation or optimized implementations: US20150163060 Methods, systems and apparatus for public key encryption using error correcting codes

I do hereby acknowledge and agree that my submitted cryptosystem will be provided to the public for review and will be evaluated by NIST, and that it might not be selected for standardization by NIST. I further acknowledge that I will not receive financial or other compensation from the U.S. Government for my submission. I certify that, to the best of my knowledge, I have fully disclosed all patents and patent applications which may cover my cryptosystem, reference implementation or optimized implementations. I also acknowledge and agree that the U.S. Government may, during the public review and the evaluation process, and, if my submitted cryptosystem is selected for standardization, during the lifetime of the standard, modify my submitted cryptosystem’s specifications (e.g., to protect against a newly discovered vulnerability).

I acknowledge that NIST will announce any selected cryptosystem(s) and proceed to publish the draft standards for public comment.

I do hereby agree to provide the statements required by Sections 2.D.2 and 2.D.3, below, for any patent or patent application identified to cover the practice of my cryptosystem, reference implementation or optimized implementations and the right to use such implementations for the purposes of the public review and evaluation process.

I acknowledge that, during the post-quantum algorithm evaluation process, NIST may remove my cryptosystem from consideration for standardization. If my cryptosystem (or the derived cryptosystem) is removed from consideration for standardization or withdrawn from consideration by all submitter(s) and owner(s), I understand that rights granted and assurances made under Sections 2.D.1, 2.D.2 and 2.D.3, including use rights of the reference and optimized implementations, may be withdrawn by the submitter(s) and owner(s), as appropriate.

Date: 6 November 2017

Place: 50 Liverpool Street, 5th floor, London, EC2M 7PR, United Kingdom
G.2 Statement by Patent (and Patent Application) Owner(s)

I, Andersen Cheng of PQ Solutions Ltd am the owner or authorized representative of the owner (print full name, if different than the signer) of the following patent(s) and/or patent application(s):

GB2532242 Public Key Cryptosystem using Error Correcting Codes
US20150163060 Methods, systems and apparatus for public key encryption using error correcting codes

and do hereby commit and agree to grant to any interested party on a worldwide basis, if the cryptosystem known as NTS-KEM is selected for standardization, in consideration of its evaluation and selection by NIST, a non-exclusive license for the purpose of implementing the standard:

- without compensation and under reasonable terms and conditions that are demonstrably free of any unfair discrimination.

I further do hereby commit and agree to license such party on the same basis with respect to any other patent application or patent hereafter granted to me, or owned or controlled by me, that is or may be necessary for the purpose of implementing the standard.

I further do hereby commit and agree that I will include, in any documents transferring ownership of each patent and patent application, provisions to ensure that the commitments and assurances made by me are binding on the transferee and any future transferee.

I further do hereby commit and agree that these commitments and assurances are intended by me to be binding on successors-in-interest of each patent and patent application, regardless of whether such provisions are included in the relevant transfer documents.

I further do hereby grant to the U.S. Government, during the public review and the evaluation process, and during the lifetime of the standard, a noneexclusive, nontransferrable, irrevocable, paid-up worldwide license solely for the purpose of modifying my submitted cryptosystem's specifications (e.g., to protect against a newly discovered vulnerability) for incorporation into the standard.
