Call for Presentations
FISSEA 33rd Annual Conference
June 15th – 16th, 2020
At the National Institute of Standards and Technology
Gaithersburg, Maryland
NOW ACCEPTING SUBMISSIONS
Submission Deadline: March 13th, 2020

2020 Vision: Bringing the Future of Cybersecurity Awareness and Training into Focus

Join us for our 33rd annual conference by sharing your expertise and creative ideas with a highly motivated professional audience from the federal government and supporting industries. Our focus is on the information security awareness and training aspects of the federal workforce. Topics of interest are based on this year’s three tracks:

Track 1: Using Storytelling in Cybersecurity Awareness and Training

In this ‘back to the future’ track for FISSEA, we’re focusing on the ancient art of storytelling applied in a modern and future workplace setting. How do you tell effective stories in the workplace that impact emotion, beliefs, and ultimately behavior? What is the art of storytelling, and how can we use it to enhance and improve cybersecurity awareness and training in organizations? With a people-first view of cybersecurity, how do we bring humanity into a binary discipline and raise awareness and impact throughout the enterprise?

Track 2: The Future of Cybersecurity Awareness and Training

In the future, every job will be a tech job. So how do we, as cybersecurity educators, trainers, and communicators address this future-fact? How do we engage an increasingly technical and dispersed workforce, while also addressing multi-generational cultural, age, and attitudes about technology and cybersecurity today and in the future? This track focuses on the future of cybersecurity awareness and training and developing holistic programs that go beyond compliance and are engrained in the fabric of everyday life.

Track 3: New Strategies, Tools, and Techniques

While looking forward at how training and awareness will change, how are you planning to engage the workforce, track and measure success, and what tools will you use? What are the factors that will have the biggest impact, and what metrics are necessary to track and measure that impact? This track focuses on the tools, technology, and strategies needed for high impact awareness and training for a workforce increasingly engrained in technology.

FISSEA invites proposals for Panel Discussions, Topic Sessions, and FISSEA Ignite (shorter, lightening-round talks). Please keep in mind that sessions are not marketing opportunities, thus corporate marketing materials are not permitted during the sessions.

Email submission form to fissea-call@nist.gov

Submission Form for Proposed Presentation

FISSEA 2020 Conference

Please Note: FISSEA is seeking speaker presentations (i.e., not papers). If you submit a proposal, we will assume that you will be available to present on June 15th or 16th. Topic and panel sessions, including Q&A, will be limited to 30 or 45 minutes.

FISSEA Ignite! are short 10-minute presentations about an idea you are passionate about. They are quick, creative, and informative sessions we have formatted after a well-known series of talks that encompass Technology, Education, and Design, and we’re excited to add this new feature again to the conference.

[Note: Please submit a separate form if you would like to submit more than one presentation.]
