JULY 2023

Initiative Number: 5.5.4

Initiative Title: Promulgate and amplify Cybersecurity Supply Chain Risk Management (C-SCRM) key practices across and within critical infrastructure sectors

Initiative Description

Increase trust in foreign suppliers through the promulgation and amplification of C-SCRM best practices at home and abroad through a Software Supply Chain Security National Cybersecurity Center of Excellence Project.

NCS Reference

This dependency on critical foreign products and services from untrusted suppliers introduces multiple sources of systemic risk to our digital ecosystem. Mitigating this risk will require long-term, strategic collaboration between public and private sectors at home and abroad to rebalance global supply chains and make them more transparent, secure, resilient, and trustworthy.

Responsible Agency: NIST

Completion Date: 2Q FY25
