- ✓ **No change** in **total number** of requirements (still 110)

Updated Security Requirements

- Updated security requirement structure
- ✓ **Organization-defined parameters** (ODP) included in some requirements
 - ODP include assignment & selection operations
- ✓ Direct link to **source** SP 800-53 control(s)

3.15.3. Rules of Behavior

- a. Establish and provide to individuals requiring access to the system, the rules that describe their responsibilities and expected behavior for handling CUI and system usage.
- b. Review and update the rules of behavior [Assignment: organization-defined frequency].

New ODP

New requirement structure

DISCUSSION

Rules of behavior represent a type of access agreement for system users. Organizations consider rules of behavior for the handling of CUI based on individual user roles and responsibilities and differentiate between rules that apply to privileged users and rules that apply to general users.
