

NIST STPPA #5: Special Topics on Privacy and Public Auditability (Event 5)

Panel conversation on IBE, ABE and Broadcast Encryption

Example topics for conversation (2023-Feb-09, 15:00–15:50 EST):

- ▶ Are there “privacy with public auditability” use-cases being hindered by lack of standardization?
- ▶ Readiness for adoption: feasible today? common (Mis)understandings?
- ▶ PQC vs. urgency of applications yet-without PQC solutions
- ▶ What can NIST do to help? Ref material, recommendations, standards? Reach stakeholders?
- ▶ What is the vision/dream (5 years, 20 years)?

Panelists: Dan Boneh (Stanford University), Melissa Chase (Microsoft Research), Tanya Verma (Cloudflare), Hoeteck Wee (NTT Research). **Moderators** (NIST-PEC team): Luís Brandão, René Peralta, Angela Robinson.
