

**ZTA Focus Group Meeting
1/24/2023**

SUMMARY

Discussions included:

What is the research methodology?

- Data Application Services (DAS)
- Foundational documents?
- Using frameworks, which one?
- Zero Trust tenants such as:
 - Identity and access management.
 - Continuous monitoring across the multi-cloud settings.

Reviewed Use Case Analysis spreadsheet.

- Reviewed RMF steps in column D.

Discussed methodology for research.

- What is in place by the cloud service provider?
- What is missing?

Will review use cases in the ConOps document to identify if ZTA is implemented.

Discussed whether cloud service providers are implementing or how they are implementing the RMF steps in the spreadsheet.

- Need to review publicly available documentation provide by the cloud service providers.

Discussed use cases and various implementation scenarios.

- May need to make assumptions on use cases.
 - For SaaS environments identify responsibilities and map data flows.
 - Identify the types of users and devices.

Identified that research should be vendor agnostic.

- Need to review components of ZTA services.
