NIST,

The following are my comments for NIST SP 800-171 r3

Add some or all of the NFO controls to the CUI baseline of the tailoring, specifically ones that require plans

- Configuration Management Plan
- Incident Response Plan

Improve the process for items to go through the FIPS validation process effectively to make the amount of FIPS validated items more available.

Add NIST SP 800-171 tailoring to NIST SP 800-53B to allow 171 to be updated more frequently and less delay to the standard as things in cybersecurity are changing in a rapid pace.

Best Regards,

Ryan Shaver | Cybersecurity Analyst
