I would love to see some substantiation of how and when CUI is called out. As a sub-contractor without CUI in any contracts, it would leave me to believe that we do not have any CUI, however I don't believe that actually is currently or will always be the case. Starting with Scoping which is where everyone says to start is very difficult when you either don't have CUI in Contracts currently or your Contracting Officer's claim they do not see or honor CUI right now. Thank you

Jon
