

What We Need in Voting Standards

Future of Voting Symposium

Gaithersburg, Maryland
February 27, 2013

Moderator: Mary Brady

Panel: Jack Cobb
Doug Jones

Clayton Lewis

Matt Masterson

NIST

Overview

Additions/Deletions to voting standards:

What topics, themes, and other items should be added to or removed from next generation voting standards? What should the scope include?

Type of standard:

What should the next generation voting standards look like, and who should be involved in creating them?

Changes to testing:

How will new themes and a revised scope of voting system standards affect testing?

Topics

- Additions/Deletions to voting standards?
 - Additions: Epollbooks, voter registration, UOCAVA, auditability, interoperability
 - Deletions: Documentation (TDP), source code
 - COTS/GOTS/MOTS
 - Is this enough or too little?
- Type of standard
 - Agile standard (current, lightweight, pointing to other standards)
 - High level requirements vs. detailed requirements
 - Modularity
 - Component certification
 - International standard vs. localized standard
 - Close integration with the certification program
- Changes to testing?
 - Testability
 - Coverage
 - Size
 - Cost
