Hello,

I find that a big problem is that these options make it difficult for some orgs. If they pick something, it might meet a standard. So instead of something like:

3.1.8 Unsuccessful Logon Attempts Limit the number of consecutive invalid logon attempts by a user to [Assignment: organization defined number] in [Assignment: organization-defined time period].

Have something like:

3.1.8 Unsuccessful Logon Attempts Limit the number of consecutive invalid logon attempts by a user to 3 (three) in 15 minutes.

Regards,
